

WHAT MATTERS

ANSWERING THE 5 W'S ABOUT GREASE GUARD

WHO?

The Grease Guard teams are all motivated by educating & helping everyone they talk to about the harmful effects of these substances. The truth is the damage effects not only roof membranes, but other people, and the environment. Since day one we have strived to help people with problems.

WHAT?

Grease Guard® Rooftop Defense Systems® are rooftop grease containment systems that are installed around fat, grease, oil, & chemical producing exhaust fans and ventilation equipment to collect fats, oils, greases, and other chemicals to effectively prevent them from damaging rooftops, providing fuel to fire, and polluting our water supplies amongst other benefits.

WHERE?

Grease Guard is manufactured and available anywhere in the mainland USA as well Canada, Puerto Rico, and Mexico. Our corporate HQ in Naperville, IL assembles the product and can direct ship to your job site, install location, or business. You can find Grease Guards installed everywhere there is fats, oils, and greases.

WHEN?

The Grease Guard product was invented in 1989 when a group of college students began noticing grease on restaurant rooftops during their nightly kitchen exhaust cleaning work. Since that invention Grease Guard has been working everyday to prevent this still very prevalent issue.

WHY?

The most important questions have the most important answers. It is a question that brings us all the way back to the time of our invention in 1989 when grease was first spotted on the first rooftop. Just as it was then, it is even more so now, our corporate mission and values:

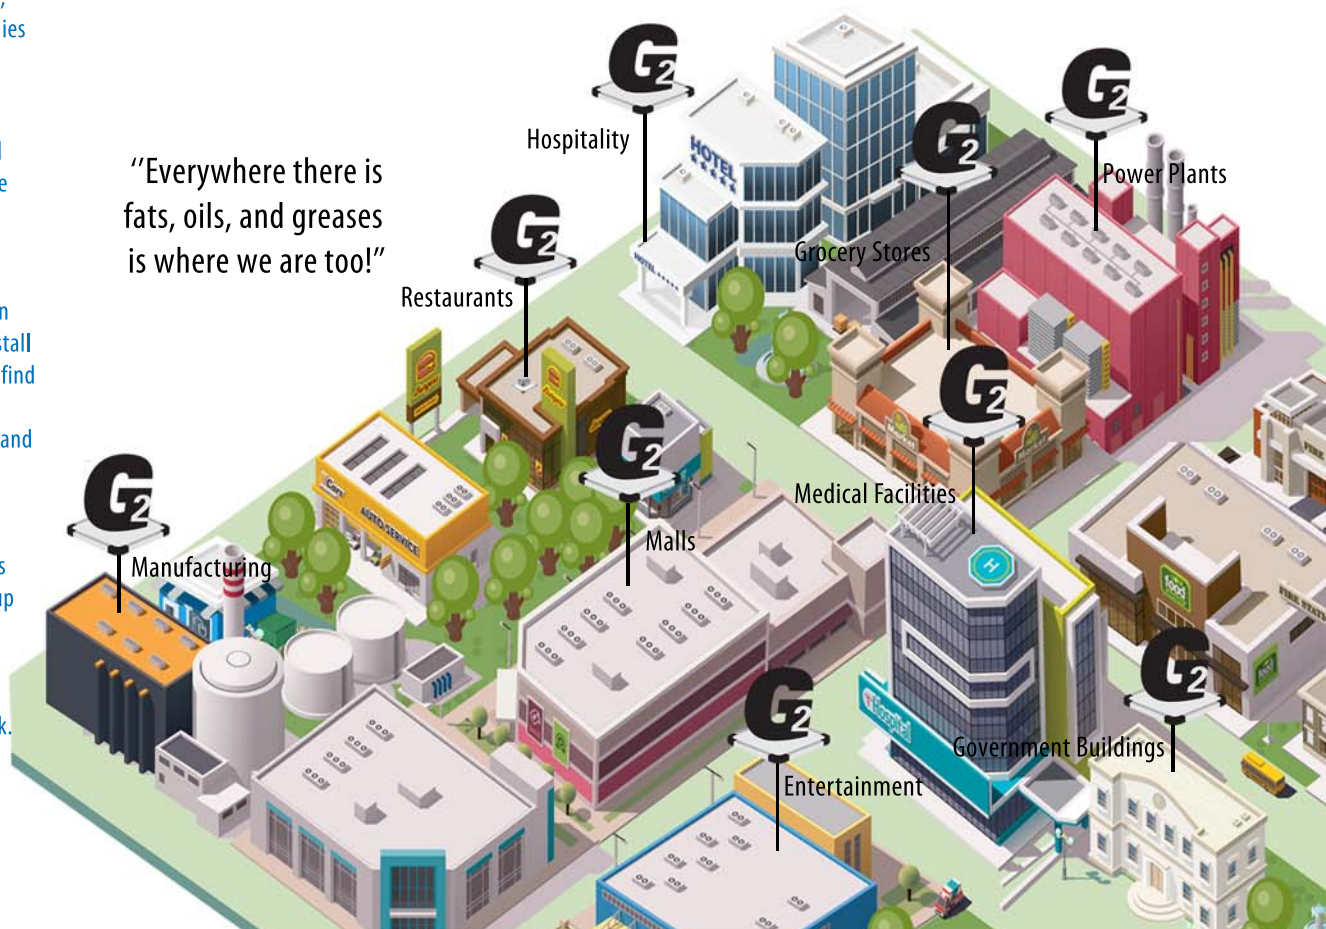

OUR MISSION

- Provide the most efficient rooftop containment solutions at the highest quality.
- Create a company that puts the needs of internal and external clients before the needs of one.
- Protect the environment around us with eco-friendly, sustainable practices.
- Grow with our people and clients, together, building long-term partnerships.

OUR VALUES

- Quality – A task is only completed when it is completed properly and to the highest utmost standards.
- Integrity – Good moral character does not falter or waiver.
- Accountability – Respect your decisions and accept the consequences, both good and bad.
- Passion – Bring your heart with you in everything you do, and remember what you work toward.
- Courage – The ability to face our future with a strong unwavering foundation.
- Intelligence – Efficiency is the result of strategic solutions that come from knowledge and experience.

“Everywhere there is fats, oils, and greases is where we are too!”
